Hi Glinda,

I have revised the human section based on your comments and our discussion. It is not at the point of a spelling/ grammar check. I did cc Barbara in case she has the opportunity to take a look, but I doubt it.

I have to move on to revising the animal section, but can you please take a quick look and see if I captured your input/ our discussions and see if it still makes sense?

Also, if you can fill in the table information for the 3 highlighted studies in the tables (and, possibly, suggest text to trim from the other studies), that would be very helpful.

Thanks!
Andrew
